

# NONA REPAIR

## BONDED NUTPLATE REPAIR

### BENEFITS

**Over 90% Faster.** Using the existing qualified epoxy adhesive, this system can deliver the same level of cure and quality in less than 2 hours instead of the current 24 hours.

**Safe.** The use of controlled, localized heating protects both the aircraft and the operator.

**Drop In Solution.** This system works with existing ClickBond nutplates and epoxy adhesive. The system can be tailored to multiple materials and shop scenarios and is highly scalable.

### APPLICATIONS

In-field repair

Depot repair

Original Equipment Manufacturing
